- NSQ.io

- Demo

- Q&A

Queue

/kju:/

noun

1 chiefly brit. a line or sequence of people or vehicles awaiting their turn to be attended to or to proceed.

2 computing: a list of data items, commands, etc., stored so as to be retrievable in a definite order, usually the order of insertion.

3 archaic: a plait of hair worn at the back.

Queues

- Logically unified system used to emit and receive data
- Natural fit for distributed architectures
- Allow realtime & batch/offline
- Easy decoupling of code from protocol and specs
- Allow plug&play^(tm) workflows

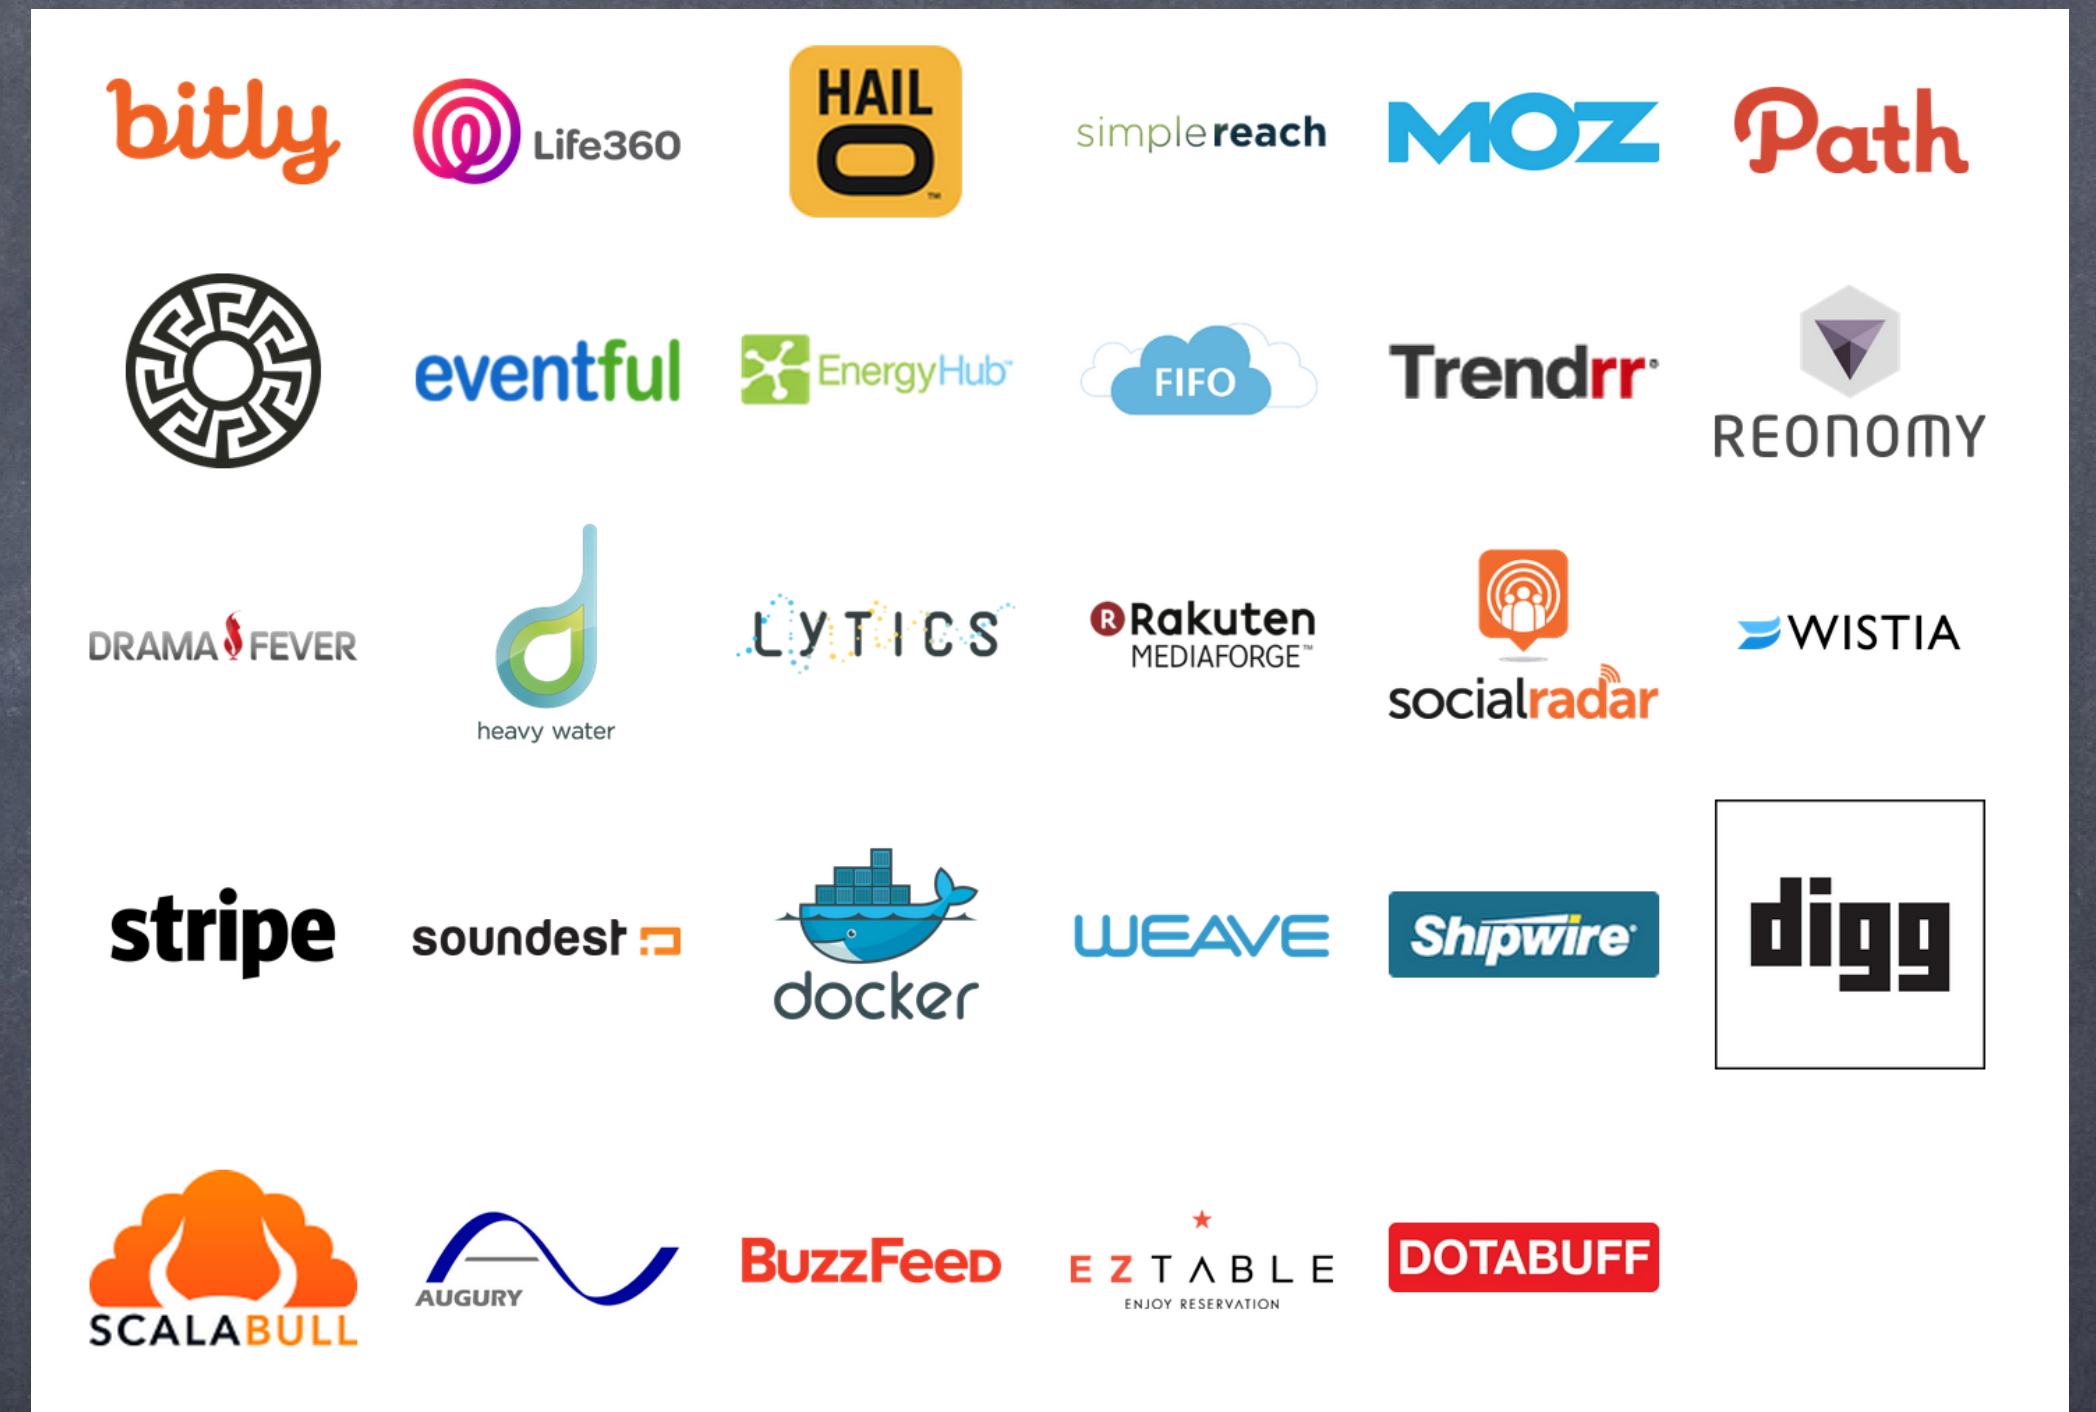

Common Queue Patterns

- Unicast (producer to one consumer)
- Broadcast (producer to all consumers... PubSub™)
- Multicast (producer to groups of consumers)

NSQ.io

github.com/bitly/nsq

nsq-users@googlegroups.com
#nsq on freenode
@nsqio

NSQ.io

- realtime distributed messaging platform
- designed to operate at scale
- can handle billions msg/day
- distributed and decentralised topologies
- no SPOF, fault tolerant, HA
- reliable message delivery guarantee

Libraries & tooling

- All main languages, official NodeJS, Go and Python
- Nodejs: `npm install nsqjs`
- `nsqlookupd`: topic & producers/consumers discovery
- `nsqd`: reading/writing messages
- `nsq_to_*`: shell utilities
- `nsqadmin` (GUI)

NSQ binaries

```
$ ls -lh /opt/nsq/bin/
```

```
-rwxr-xr-x 6.8M nsq_pubsub  
-rwxr-xr-x 6.5M nsq_stat  
-rwxr-xr-x 6.8M nsq_tail  
-rwxr-xr-x 6.9M nsq_to_file  
-rwxr-xr-x 6.9M nsq_to_http  
-rwxr-xr-x 7.0M nsq_to_nsq  
-rwxr-xr-x 8.3M nsqadmin  
-rwxr-xr-x 8.8M nsqd  
-rwxr-xr-x 8.0M nsqlookupd  
-rwxr-xr-x 6.7M to_nsq
```

NSQ start

```
$ nsqlookupd &> nsqlookupd.log &
```

```
$ nsqd --lookupd-tcp-address=127.0.0.1:4160 &> nsqd.log &
```

```
$ nsqadmin --lookupd-http-address=127.0.0.1:4161 &> nsqadmin.log &
```

NSQ in Nodejs

//subscribe to a NSQ topic

```
var nsq = require('nsqjs');
```

```
var reader = new nsq.Reader('topic', 'channel', {  
  lookupdHTTPAddresses: '127.0.0.1:4161'  
});
```

```
reader.connect();
```

```
reader.on('message', function (msg) {  
  console.log('Received message [%s]: %s', msg.id, msg.body.toString());  
  msg.finish();  
});
```

NSQ in Nodejs

//writes a message to a NSQ topic

```
var nsq = require('nsqjs');  
var writer = new nsq.Writer('127.0.0.1', 4150);  
  
writer.connect();  
  
writer.on('ready', function () {  
  writer.publish('topic', 'message', function (err) {  
    if (err) { return console.error(err.message); }  
    writer.close();  
  });  
});  
  
writer.on('closed', function () {  
  console.log('Writer closed');  
});
```

NSQ in Shell

#stream to nsq

while read x

do

echo \$x | to_nsq --nsqd-tcp-address=127.0.0.1:4150 --topic=stdin

done

#nsq to http

**nsq_to_http -lookupd-http-address=127.0.0.1:4161 -topic=stdin -content-type="text/plain" -
post="http://127.0.0.1:3000/stdin"**

#tail

nsq_tail -lookupd-http-address=127.0.0.1:4161 -topic=stdin

#persist

nsq_to_file -lookupd-http-address=127.0.0.1:4161 -topic=stdin -output-dir="."

#cross Datacenter / AZ

nsq_to_nsq -destination-nsqd-tcp-address=dc2:4160 -destination-topic=stdin

NSQ in Shell

#post a message to nsqd http endpoint

curl -d 'message' '<http://127.0.0.1:4151/pub?topic=thetopic>'

#post multiples messages to nsqd http endpoint

curl -d 'message1\nmessage2\nmessage3' '<http://127.0.0.1:4151/mpub?topic=thetopic>'

other nsqd http endpoints:

/topic/

/create /delete /empty /pause /unpause

/channel/

/create /delete /empty /pause /unpause

/stats

/ping

/info
